

## **Amendments to the Specification**

On page 1, line 1, please replace the title of the invention with the following marked up title:

Mobile Terminal Having Personal Computer Camera Function and Method for Performing Personal Computer Camera Function in Mobile Terminal

Please replace the paragraph on page 13, lines 2-8, with the following amended paragraph:

FIG. 5 is a block diagram illustrating a mobile terminal having an image processing function in accordance with a second embodiment of the present invention. The mobile terminal having an image processing function includes a first analogue switch 511, a second analogue switch 512, a USB transceiver 520, a controller such as an MSM 530, an image DSP 640-540 and an image sensor 550.

Please replace the paragraph on 13, line 27, to page 14, line 6, with the following amended paragraph:

The second analogue switch 512 is connected to the external machine 500 through a communication line and performs multi-switching operation based on a PC camera signal PC\_CAMERA. If the PC camera signal PC\_CAMERA is activated, the second analogue switch 612-512 provides a data path for the image DSP 540. The second analogue switch 512 is a dual SPDT switch, which maintains the open state when the PC camera signal PC\_CAMERA is inactivated.
